IN TYRES

# NITROGEN IN TYRES

Increase your profits by offering a value-added service to your customers. With Nitrogen, you are providing the best possible inflation gas for tyres – the gas that Formula 1, Nascar, commercial aircraft and even the Tour de France use.

Build customer loyalty and encourage repeat business by selling Nitrogen for the life of the tyre. Attract new customers by offering a professional nitrogen service. Encourage them to come back to you for a free pressure check and nitrogen top-up.

## POTENTIAL PROJECTED EARNINGS:

1 car	10 cars
R2 400	R24 000
2 cars	15 cars
R4 800	R36 000
5 cars	20 cars
R12 000	R48 000

\*Calculated at R25/tyre, inflating 4 tyres & 24 working days.

\*Equipment cost can be recovered in only a couple of months.

\*Rental cost is covered by as little as 1 car per day.

## FEATURES AND BENEFITS

Nitralife nitrogen generators make nitrogen gas from your air compressor. *No refilling needed.*

Nitrogen tyres run at optimum temperature. Nitrogen is a pure, inert gas that does not retain heat. A tyre that won't over-heat is a safer tyre.

Versatility is key. Available as a wall mounted solution or as a trolley for workshop mobility.

Our Nitrogen Generators are 100% pneumatic. *No electricity needed.*

Nitrogen extends tyre life. Tyres at the correct temperature and the correct pressure will give you maximum tyre life.

Tyres maintain pressure better. Nitrogen is the slowest migrating gas through a tyre. Less top-ups needed and less worry about your tyres.

Wall mounted NP60

Mobile trolley >
